

Invasive species hurt walleye fishing

Keep them out of Wabigoon!

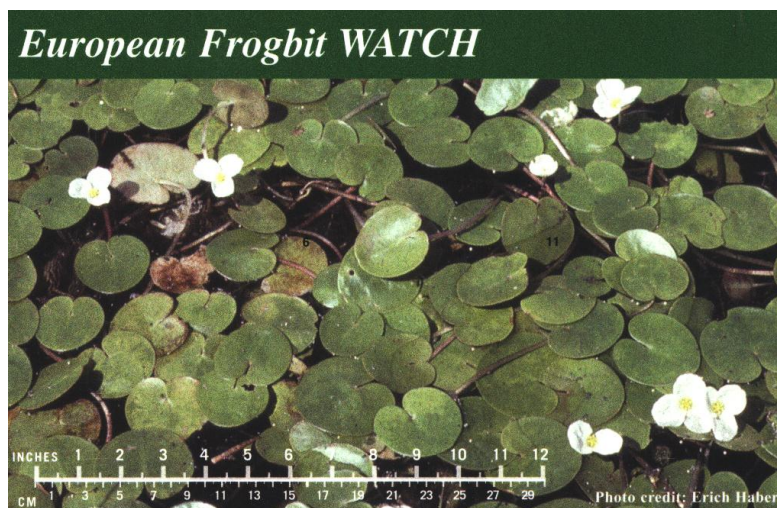

If your boat is coming from another lake please:

- ✓ Rinse your boat and equipment with hot tap water (>50°C), **or**
- ✓ Pressure wash your boat (>250 PSI), **or**
- ✓ Dry your boat and equipment in the sun for at least 5 days

When you are done fishing please:

- ✓ Removal all plants from your boat and equipment
- ✓ Drain water from motor, live well, bilge and transom wells
- ✓ Empty bait bucket on land 30 m (98') away from water's edge - **RELEASING LIVE BAIT IS ILLEGAL!**

The Wabigoon Chain has an invasive species: European Frogbit. This plant spreads very easily and smothers fish habitat. Please remove any plant pieces from your boat when you leave the Wabigoon Chain.

Keep walleye fishing on Wabigoon great!
